

Backseat textbook holder.

- For students to store their textbooks and supplies.
- Prevents expensive textbooks from sliding and becoming damaged.
- Easier to access than the trunk, or front passenger seat.
- 3 style/color options for different consumers:
 - pink/purple
 - black
 - clear
- Possible Materials?
 - plastic
 - nylon mesh
 - wood
- Possible features:
 - *cover with a hinge (so that books are not visible through the window)*
 - seatbelt interface, to prevent sliding.
 - easily slide to middle seat
- Design Challenges
 - How do we design quick attach for seat belt?
 - similar to baby seat?
 - How do we accept different size books?
 - spring loaded adjustable sections?
